GHR Healthcare

Automating Invoice Generation

GHR Reduces Manual Work and Speeds Up Invoicing

Here's how D.W.I.G.H.T. helps GHR Healthcare generate over 1,000 invoices per week.

GHR's business-critical invoicing process relied too much on manual input that was incredibly time-consuming and led to cash collection delays. While a simple workflow, the process presented a wider risk when it came to employee resources.

Every Thursday, two team members were responsible for producing 1,000 invoices. This took an entire day. While very important, the GHR team's time could be better spent elsewhere.

GHR wanted D.W.I.G.H.T.® to:

Minimise reliance on a few individuals for essential business tasks	Improve accuracy	Speed up invoice generation	Free up internal teams to focus on higher-value work

Here's what D.W.I.G.H.T. does

Generates **1,000+** invoices a week.

Frees up **two** full working days of manual work.

Saves a day of Days Sales Outstanding (DSO) for the business.

D.W.I.G.H.T.'s solution:

D.W.I.G.H.T. partnered with GHR to **automate invoice generation** using intelligent automation.

Once invoice data becomes available, D.W.I.G.H.T. **runs the process overnight**, **operating 24/7** without delays or manual intervention.

This means invoices are **generated consistently, at scale**, and without relying on two people manually completing the task each week.

D.W.I.G.H.T. quickly developed and implemented an **automated workflow** capable of handling GHR's invoicing volume reliably and efficiently.

DWIGHT quickly came in, developed an automated process and now handles over 1,000 invoices per week, saving two man-days and generating an extra day of DSO for us. It's automated completely, driving efficiencies and saving costs. We're now looking at other processes that our good friend DWIGHT can help us with to drive efficiencies throughout the whole of GHR.
